

International Experiences with Zero-Rating practices

**Constitutional Court of Colombia, Oficio N° OPC-169/22
Thomas Lohninger (epicenter.works), 18. November 2022**

Types of relevant offerings

- Sub-internet offer *
- Zero-rating against payment (sponsored data)
- Zero-rating of individual applications
- Zero-rating of classes of applications
- Zero-rating that is application agnostic

* CRC Resolution 3502 Article 9 is based on the provision that the court examines

✓ = allowed, ✗ = prohibited, ~ = case-by-case

	Colombia	India	EU*	Canada	USA**	California & Washington
Sub-internet	✓	✗	✗	✗	✓	✗
Sponsored data	✓	✗	✗	✗	✓	✗
Individual applications	✓	✗	✗	✗	✓	✗
Classes of Applications	✓	✗	✗	✗	✓	~
Application-agnostic	✓	✓	✓	✓	✓	✓

* post judgements of the European Court of Justice C-854/19, C-5/20 and C-34/20

** post Donald Trump repeal of the 2015 FCC Open Internet Order

Impact on the Telecom Market

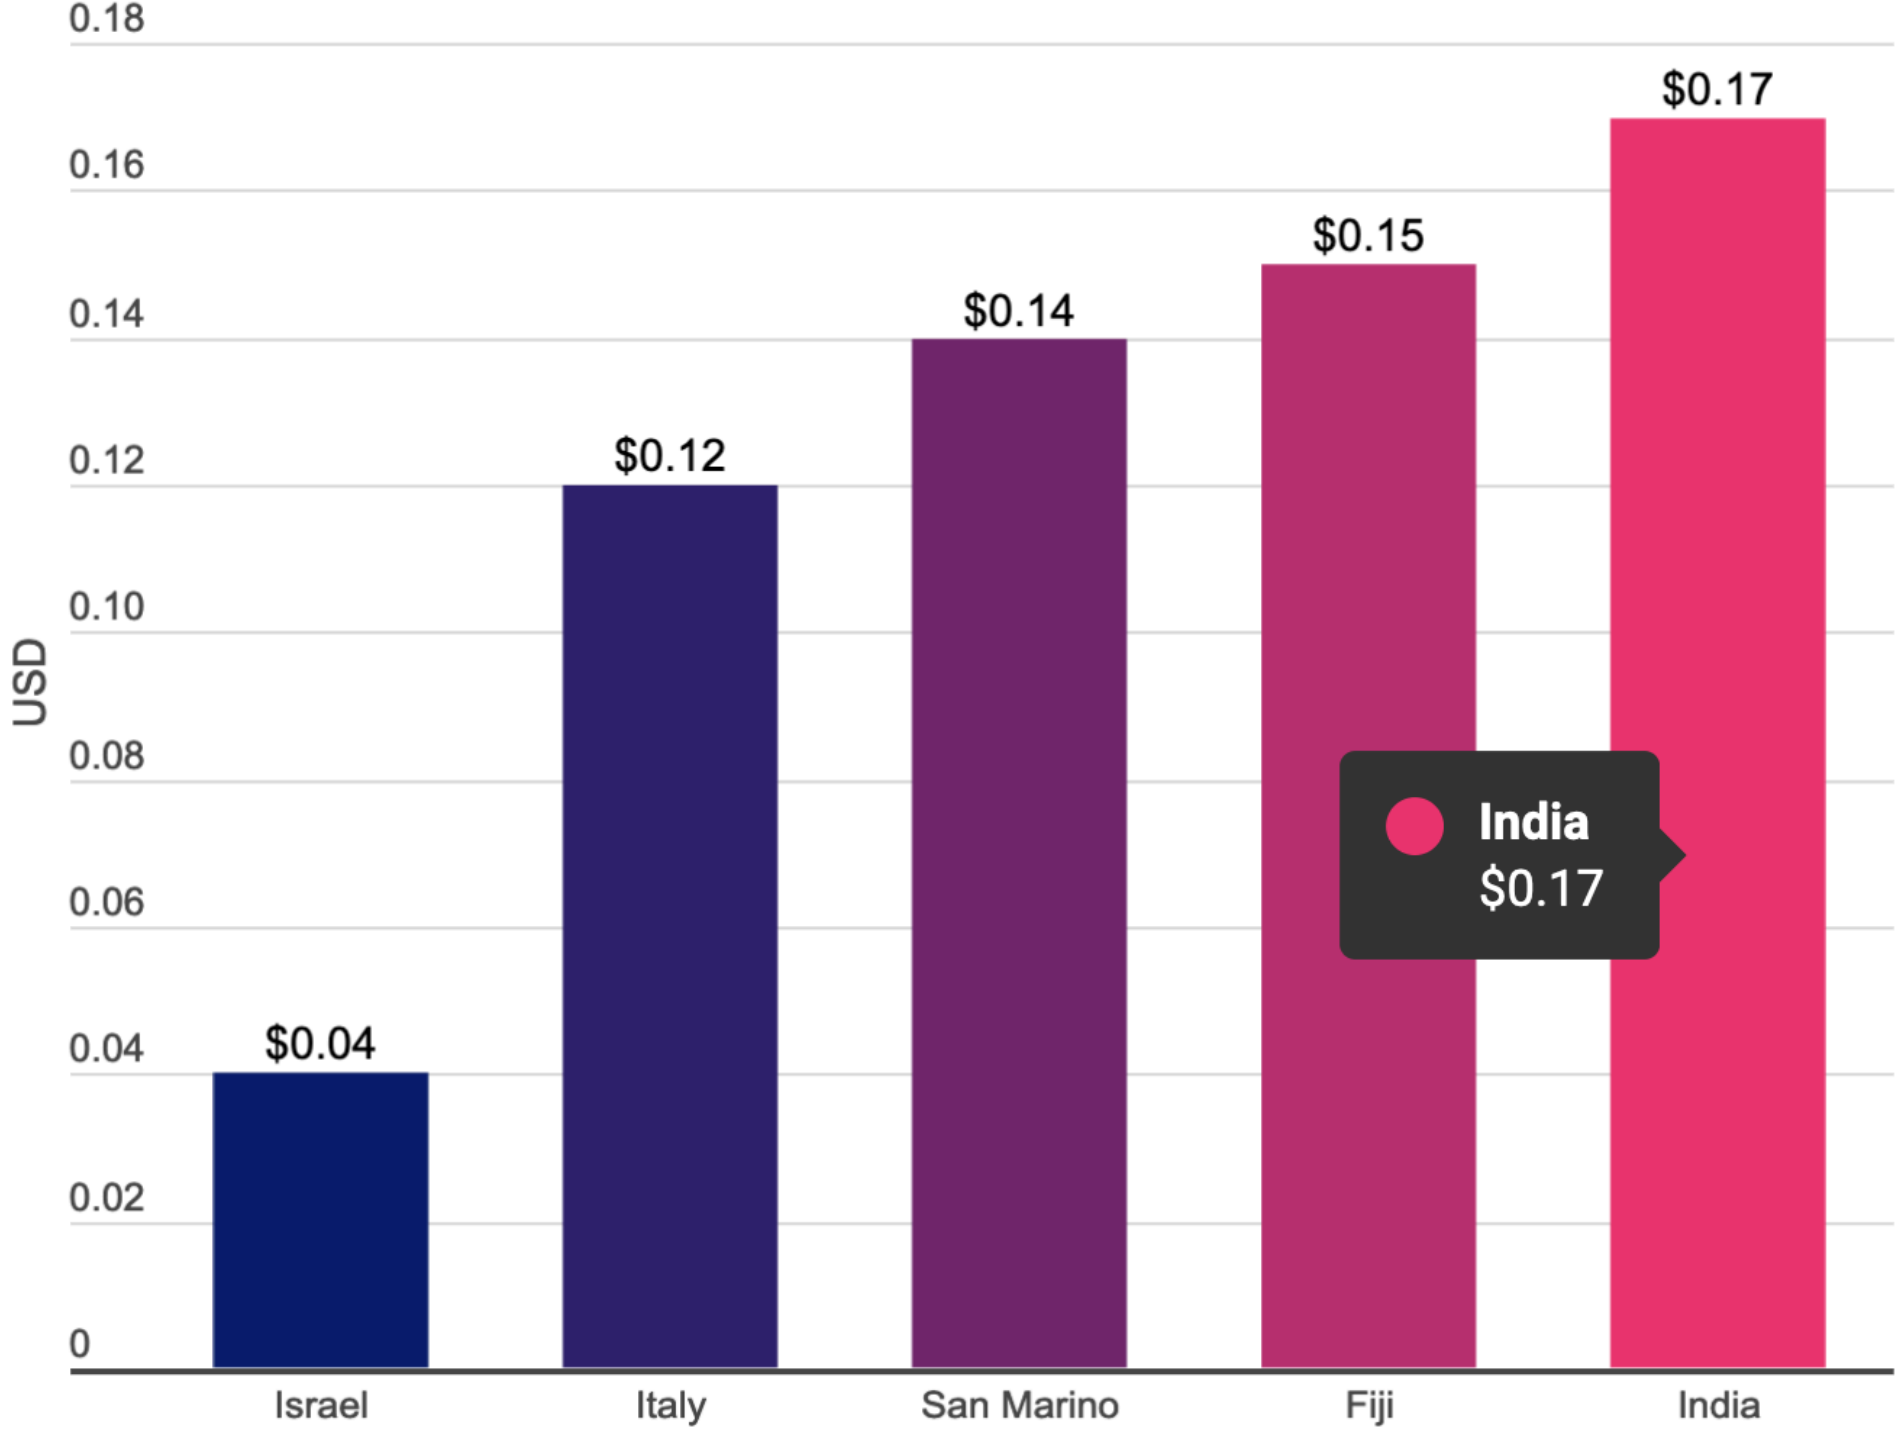

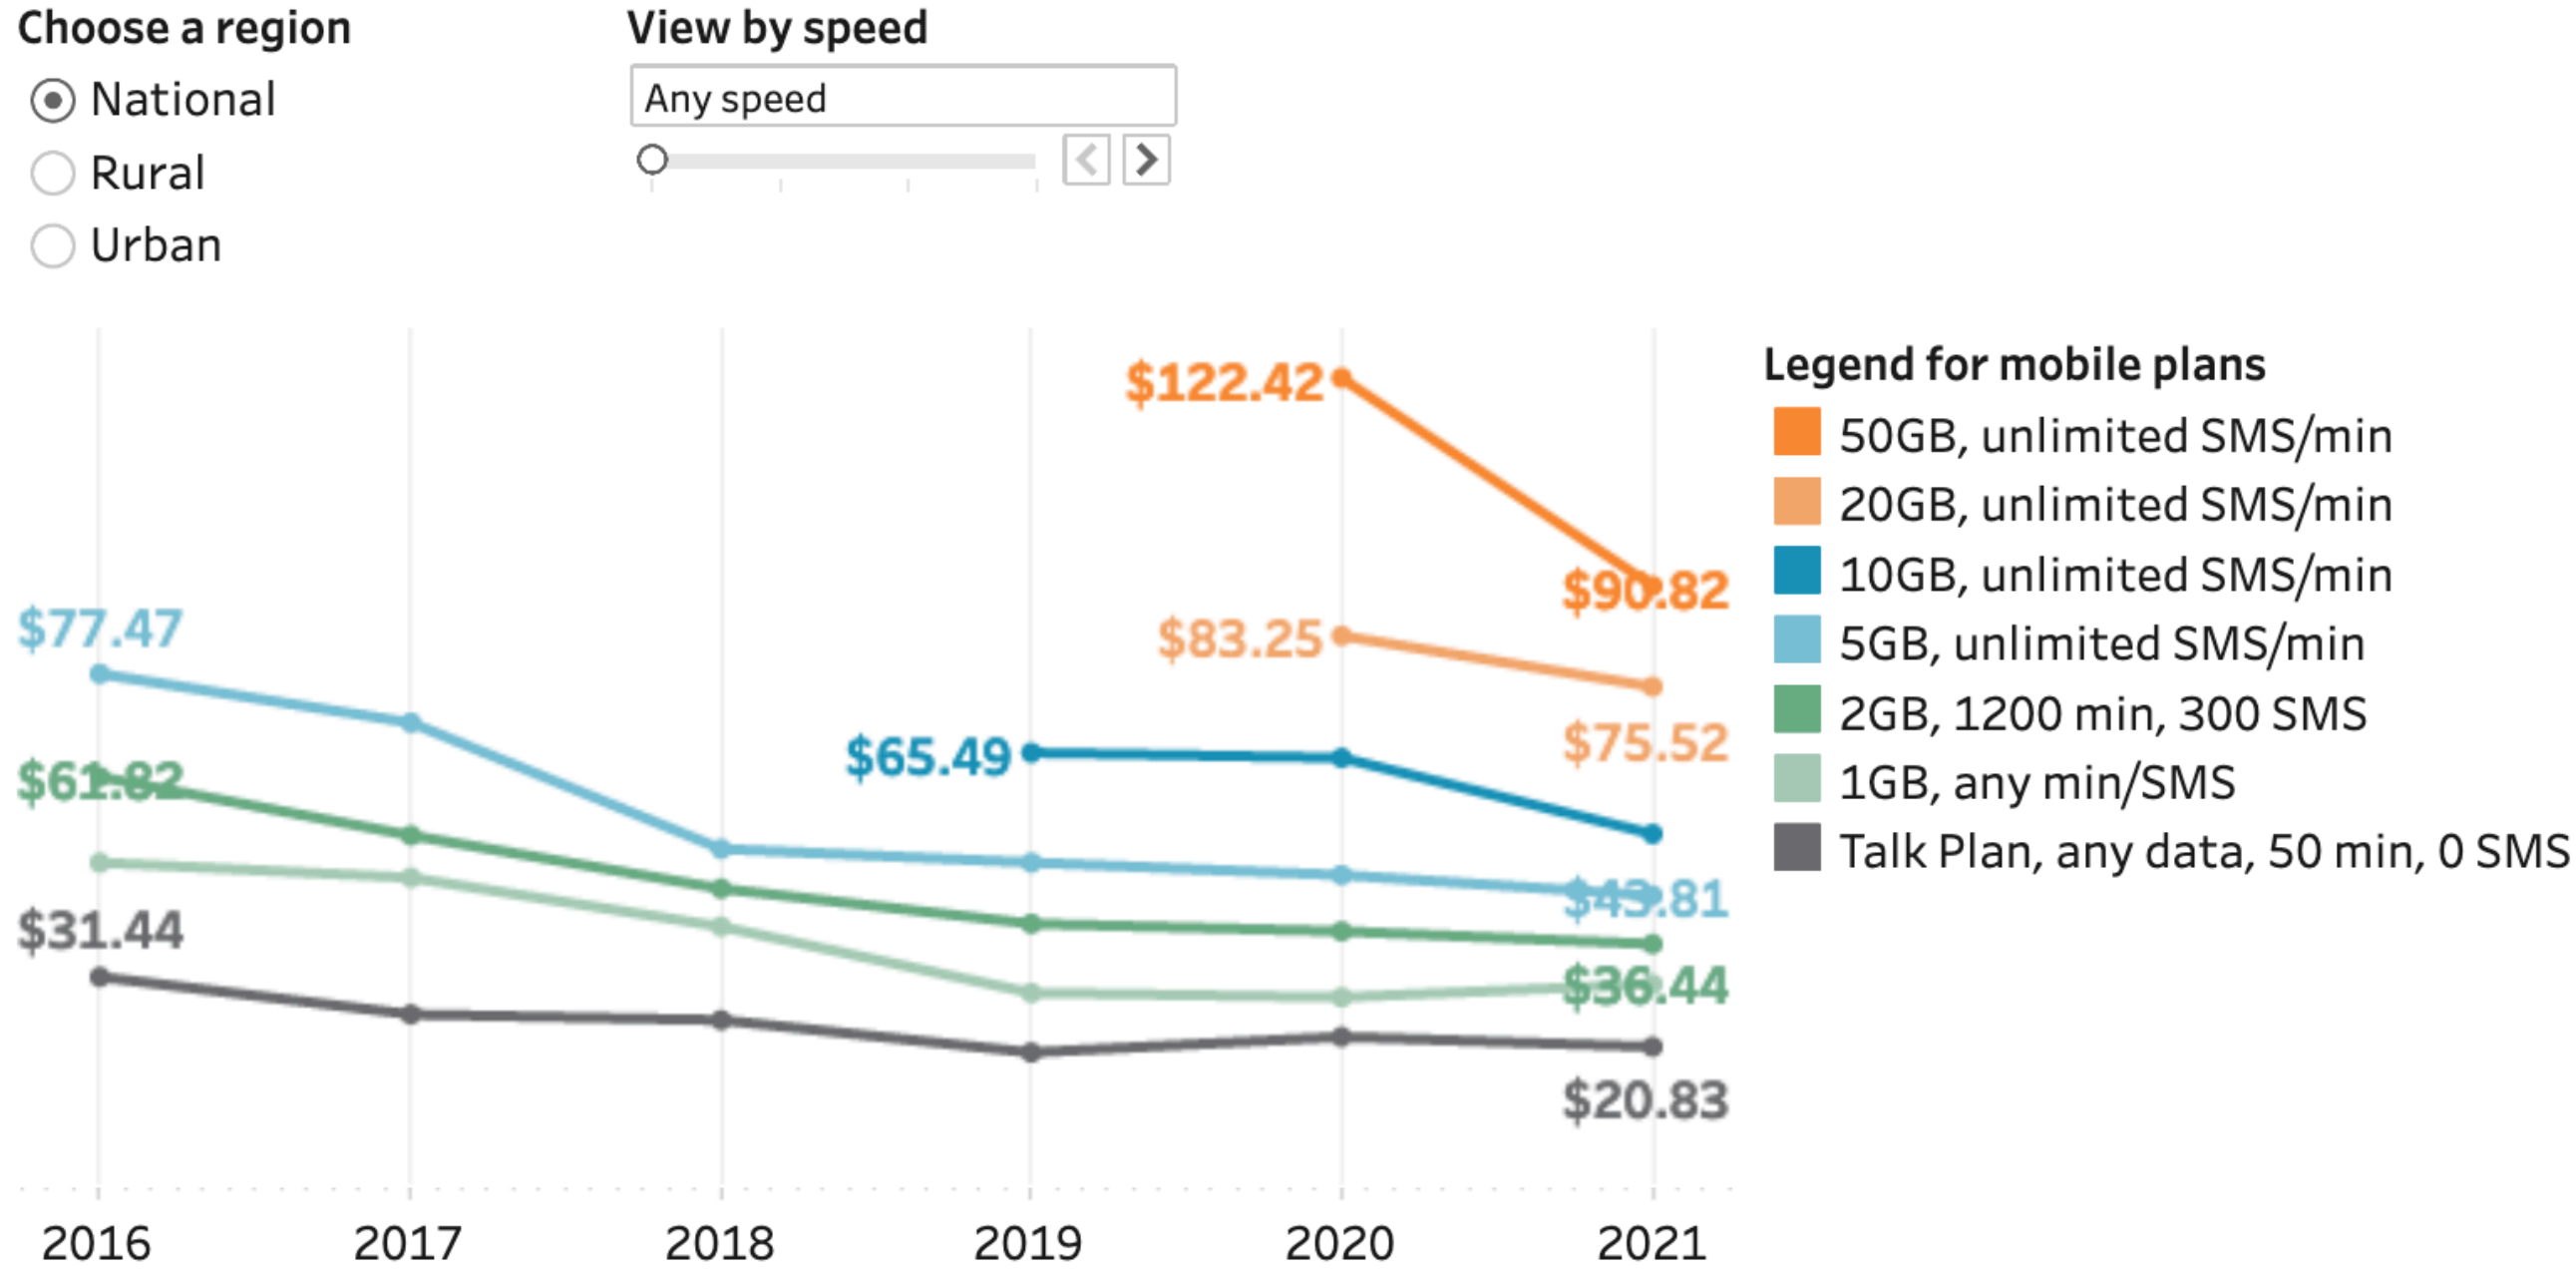

**Zero-rating keeps data volumes
artificially low and prices high**

Prohibiting zero-rating correlates with lower prices for data volume

Least expensive

Canada

- Legend for mobile plans
- 50GB, unlimited SMS/min
 - 20GB, unlimited SMS/min
 - 10GB, unlimited SMS/min
 - 5GB, unlimited SMS/min
 - 2GB, 1200 min, 300 SMS
 - 1GB, any min/SMS
 - Talk Plan, any data, 50 min, 0 SMS

**Prohibiting zero-rating is good for
the affordability of the internet**

“[...] Further, the evidence on the record does not suggest that any future differential pricing practices in Canada will be implemented in a manner that improves the adoption of Internet access services or their affordability. **The Commission is not persuaded that differential pricing practices would improve access to the Internet or affordability in the Canadian market.**”

Impact on the Application Market

Steps to become a zero-rated App

1. Identify zero-rating offer
2. Understand technical and commercial conditions
3. Apply to the program, if possible
4. Sign contract and accept risk of penalties
5. Ongoing obligation to keep your service identifiable

How often do apps and services participate in differential pricing programs?

Facebook users who say they never follow a link out of Facebook

Impact on Data Protection

“Shall not monitor the specific content”

69. In assessing traffic management measures, NRAs should ensure that such measures do not monitor the **specific content (i.e. transport layer protocol payload)**.
70. Conversely, traffic management measures that monitor aspects other than the specific content, i.e. the generic content, should be deemed to be allowed. Monitoring techniques used by ISPs which rely on the information contained in the IP packet header, and transport layer protocol header (e.g. TCP) may be deemed to be generic content, as opposed to the specific content provided by end-users themselves (such as text, pictures and video).

How to identify an application in transit?

- **IP-addresses**
- **Domain Names or URLs**
- **Server Name Identification (SNI)**

**Zero-rating only classes of applications
exaggerates data protection problems**

4 Recommendations

Recommendations

- Prohibit sub-internet offers, zero-rating of individual applications and classes of applications and sponsored data
 - **Data volume currently reserved for these offerings should be given to the users for the same price, but application-agnostic**
- Other encouraged application-agnostic forms of zero-rating
 - No data cap off-peak times (night time)
 - Low-bandwidth mode (~1,7 Mbit/s)
