CIVIL SOCIETY WORKS!

epicenter.works is the leading Austrian NGO committed to strengthening our fundamental rights and freedoms in the digital age. A donation-funded association, it works against the extension of state surveillance, for the fundamental right to privacy and a free, open Internet.

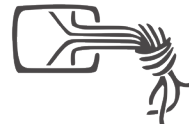

Even in the early period of our association's existence (named at the time "AK Vorrat" - Working Group against Data Retention in Austria), we managed to mobilise more than 100,000 people for our cause, and in 2014 reached our goal with the repeal of the EU directive on data retention by the European Court of Justice.

Since then, epicenter.works has been a critical companion to all plans to extend surveillance powers of the state. Our experts point out the effects of new proposals in digital policy and develop concrete solutions in accordance with fundamental rights.
